# Acknowledgement of AI Usage

### COMP5415/4415 · Multimedia Design & Authoring | BLOOM - From cherry to cup

Anugraha Jawahar | SID: 550859969 · Updated 19 October 2026

## PART A - Have you used AI in the completion of this assignment?

### YES.

I used Claude MCP and ChatGPT while preparing this presentation. I made the presentation in Canva and then exported it to Microsoft PowerPoint format to make further edits and avoid compatibility issues. I used Claude MCP to assist with ideation and keep me on track with the marking rubric. It reviewed my original work and suggested fixes and updates to improve my presentation. I used ChatGPT to help find references, as mentioned in the presentation.

### Evidence labels

The explanations below are written from my own account of the work and match Section 7 of my report. Claude assisted with drafting this acknowledgement, as declared in C14.

## PART B - AI Tools used

| AI tool | Link | Tasks and reasons |
|---|---|---|
| Claude MCP | https://claude.ai | Assistance with ideation, checking my presentation against the marking rubric, reviewing my original work and suggesting fixes and updates. |
| ChatGPT | https://chatgpt.com | Help with finding references mentioned in the presentation and refining the wording of this acknowledgement while keeping my original tone. |

*I used Canva to make the presentation and Microsoft PowerPoint for further edits and compatibility checks.*

## PART C – How I used AI assistance

The entries marked “summary” describe my use of the tools. They are not verbatim prompt transcripts. I was unable to recover the exact history of the prompt, since it was MCP server.

### C1. Claude MCP - Ideation and presentation review

Input (summary): I asked Claude MCP for help with ideation, to check whether I was following the marking rubric, and to review my original presentation.

Output: Suggestions for the presentation structure, fixes and updates to improve the slides.

How I used it: I used the suggestions to improve my original work and keep the presentation on track with the rubric. I made the slides in Canva and then made further edits in Microsoft PowerPoint.

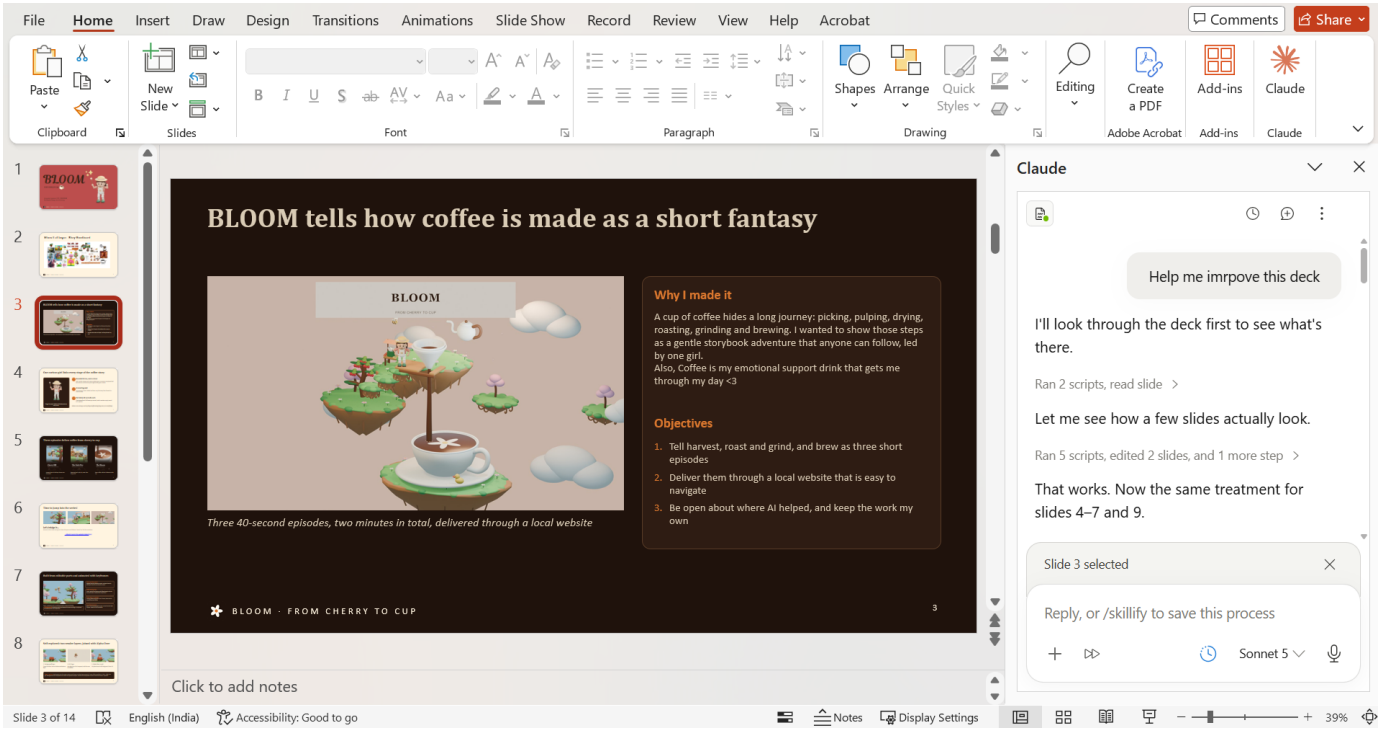

*Figure 1: Claude MCP used to ask suggestions of enhancement to improve the presentation deck*

### C2. ChatGPT - References

Input (summary): I used ChatGPT to help find references for the presentation.

Output: Reference suggestions, including the Blender Manual pages for Alpha Over and View Layers listed on slide 14, “Appendix: references and evidence”.

How I used it: I included the references in the presentation, as shown in the references slide.

### C3. ChatGPT - Acknowledgement wording

Input excerpt: “Just fill in the tone of original words”. I supplied my own description of how I made the presentation and used AI.

Output: A presentation-focused version of this acknowledgement with clearer wording.

How I used it: I used the available log history of ChatGPT and Claude as reference to write the acknowledgement.

## Declaration

This Acknowledgement is filled by me (Anugraha) in my own words and added the prompts used in AI manually. I hereby confirm that the final submission was done completely by me under my supervised use of AI, confirming the responsible use of AI.
